

AUTOPRIME[®] CE

POSITIVE DISPLACEMENT PUMP

EXPERIENCE PRECISION AND EFFICIENCY IN FLUID DISPENSING

The AUTOPRIME CE is a groundbreaking positive displacement pump expertly crafted to transform your fluid application process. Equipped with sophisticated servo motor technology and a peristaltic pump mechanism, the AUTOPRIME CE boasts a dynamic speed range of 0-250 RPM, ensuring unmatched control and precision.

Designed for seamless integration, the AUTOPRIME CE is versatile, offering multiple control options including Ethernet/IP, Modbus Communications, and an optional Human-Machine Interface (HMI) for improved user interaction. Its compact structure makes it an ideal fit for any workspace, without compromising on power and performance.

FEATURES:

- CE Certified
- 220V Power
- Intuitive Controls
- Robust Network Integration
 - Ethernet/IP or MODBUS Communications
- Front Panel Manual Forward Switch
- Direct Plug-In for Designetics Accessories

OPTIONS:

- Touchscreen HMI Control
- PROFINET Add-On
- Stackable Pump Heads
