

e3mini®

PRECISION PUMP PANEL

PRECISION AND ACCURACY IN A SMALL FOOTPRINT

Our e3mini precision pump panel offers you the utmost in control: the positive-displacement pump allows for dispensing a wide range of different fluids with an unmatched accuracy. And, the e3mini® allows for different types of user control: via HMI touchscreen; or digital or analog input. Best yet, it can be set in auto mode, making it compatible with any system. And, while the e3mini® was created by engineers, you don't need an engineering degree to set it up. Simply use the plain-to-understand HMI touchscreen. What's more, we can configure the e3mini® for your control and monitoring over an Ethernet connection.

FEATURES:

- Low Maintenance Required
- Designetics Proprietary Program
- Various Speed Control Options
- Touchscreen HMI
- CE Certified
- No Direct Contact with Fluid

OPTIONS:

- Allen Bradley Controls
- Status Indicator Light
- Corrosion-Resistant Mounting Stand
- Stackable Pump Heads
- Multiple Motor Sizes
- 220V Power
